

24/7/365

Always on. No queue, no callback, unlimited concurrent conversations

\$5K–\$1M

Face amounts quoted live from the carrier's own price-sheet grid

3

Questions to a bindable quote — age, state, target monthly premium

\$0

Payroll, benefits, holiday, sick pay, turnover or ramp time

THE FLOW — INBOUND CALL TO ISSUED POLICY, WITHOUT A HUMAN IN THE LOOP

CARRIER PRICE-SHEET GRID — PROVIDER SUPPLIED

The provider supplies the rate grid; the engine quotes from it. Product lines below are the starting set, not the limit.

Product line	\$5K	\$25K	\$100K	\$250K	\$500K	\$1M
Travel Insurance	•	•	•	•	•	•
Accidental Death & Dismemberment	•	•	•	•	•	•
Accident Medical Expense	•	•	•	•	•	•
Accident Medical + Critical Illness	•	•	•	•	•	•
Combined AD&D	•	•	•	•	•	•

Rates load from the carrier and are quoted verbatim — the engine never improvises a price. Grid extends to any product line the carrier files.

Got it — done

Payment received. You're covered. Documents are on their way to your email.

WHY THE AI WINS THIS JOB

- It mitigates risk

Every conversation follows the same approved script, quotes only carrier-filed rates, and is captured end to end. No off-script statements, no promises the policy does not make, no bad day. Compliance becomes a property of the system rather than a training problem.
- It is always on

Nights, weekends, holidays and the hour after a news story about an accident. Call volume that would need a fifty-seat floor is handled concurrently, and the fiftieth caller gets the same conversation as the first.
- It has no employment overhead

No salary, benefits, holiday, sick pay, overtime, recruiting, ramp time, attrition or seat cost. Capacity scales with demand instead of with headcount, and a slow month costs nothing.
- It streamlines the process

Three questions to a quote. One text to enroll. One post-back to issue. What used to be a callback, a paper application and a chase becomes a single unbroken conversation.

A win on both sides of the transaction

Risk mitigation, cost savings and a shorter path to coverage — for the person buying and the carrier writing.

FOR THE CONSUMER

Answered instantly, quoted honestly against their own budget, covered before they hang up.

FOR THE CARRIER

Lower acquisition cost, consistent disclosure, cleaner applications and an auditable record of every word.

- Nothing is invented. The engine quotes the grid it is given.
- Payment stays with the administrator. No card data on the call.
- Every call is a record. Transcript, quote and disposition, retained.
