

One call. Three questions. Covered before they hang up.

A voice answer engine that quotes from the carrier's own price sheet, enrolls by text, takes payment through the administrator, and never leaves the line — at any hour, at any volume, without a person in the loop.

24/7/365

Always on. No hold queue, no callback, unlimited concurrent calls

\$5K–\$1M

Face amounts quoted live from the provider's rate grid

3

Questions between hello and a real quote

\$0

Salary, benefits, holiday, sick pay, turnover or ramp

PHASE 1

The conversation

1

The call is answered

First ring, every time. Two in the morning, Thanksgiving, or the middle of a hundred-call spike — the engine picks up and the conversation starts.

2

Intake — three questions

No forms, no wizard, no "please hold." The engine asks what it needs to rate the policy and nothing else.

🎂

Age

State

Filed availability

🎯

Target premium

What they want to pay monthly

3

The grid does the work

Those three answers hit the price sheet the provider supplied. The engine reads a rate — it never invents one.

Product line	\$5K	\$25K	\$100K	\$250K	\$500K	\$1M
Travel Insurance	•	•	•	•	•	•
Accidental Death & Dismemberment	•	•	•	•	•	•
Accident Medical Expense	•	•	•	•	•	•
Accident Medical + Critical Illness	•	•	•	•	•	•
Combined AD&D	•	•	•	•	•	•

4

The quote is spoken, live

Coverage and premium come back inside the same breath of conversation. Nobody is told an agent will call them back.

THE ENGINE SAYS

"Based on your age and your state, here's what fits the monthly figure you gave me — and here's the coverage that comes with it."

5

The fork — questions, or enroll?

Questions go to the answer engine and come straight back to the quote. Ready to go moves to enrollment. There is no third door where the call is lost.

THE ENGINE ASKS

"Do you have any other questions for me, or would you like to go ahead and enroll?"

PHASE 2

The enrollment

6

A text goes out while they are still on the line

A secure enrollment link lands on the customer's phone mid-conversation. Nothing is mailed, nothing is scheduled, nobody is transferred.

POLICYSTORE

Here's your enrollment for the coverage we just discussed. Tap to review and pay securely.

🔔

AGENT WAITS ON THE LINE

Got it — done

✓

Payment received. You're covered.

Documents are on their way to your email.

7

The agent waits — it does not hand off

The call stays open while the customer opens the link. If they have a question halfway through, the same voice that quoted them answers it.

PHASE 3

The money

8

Payment runs through the third-party administrator

The customer pays the administrator directly. Card details never touch the agent, the call, or the recording — which is exactly where you want that boundary.

9

The administrator posts acceptance back

Acceptance returns to the engine automatically. The policy is issued and the documents go out — all before the call ends.

PHASE 4

The loop

10

Thank you — and confirmation in writing

THE ENGINE SAYS

"Thank you. You're covered, and your documents are on the way to your email."

11

It does not hang up

The single most valuable second in the call. A human agent, paid by the hour and measured on handle time, wants the call over. The engine has no such incentive.

THE ENGINE ASKS

"Is there anything else I can help you with today?"

↺

Any second need re-enters intake at step 2

Travel cover for a trip they just mentioned. Accident medical for a spouse. One conversation becomes several policies — and the only way it ends is the customer saying they're done.

WHY AI

Why the machine is right for this job

🛡️

It mitigates risk

The same approved script every time. Only carrier-filed rates. No off-script statements, no promises the policy doesn't make, no bad day. Every word captured and auditable. Compliance stops being a training problem and becomes a property of the system.

🌙

It is always on

Nights, weekends, holidays, and the hour after a news story sends people looking for accident cover. Volume that would need a fifty-seat floor is handled at once — and the fiftieth caller gets the same conversation as the first.

🏆

It carries no employment overhead

No salary, benefits, holiday, sick pay, overtime, recruiting, ramp time, attrition or seat cost. Capacity scales with demand rather than headcount, and a slow month costs nothing at all.

⚡

It streamlines everything

Three questions to a quote. One text to enroll. One post-back to issue. What used to be a callback, a paper application and a week of chasing collapses into a single unbroken conversation.

A win on both sides of the transaction

Risk mitigation, cost savings and a shorter path to coverage — for the person buying and for the carrier writing.

FOR THE CONSUMER

✓ Answered immediately, at whatever hour they actually thought about it

✓ Quoted honestly against the budget they named themselves

✓ No pressure, no pitch that drifts, no callback that never comes

✓ Covered and confirmed before the call ends

FOR THE CARRIER

✓ Lower acquisition cost with no floor to staff or scale

✓ Identical disclosure on every single call

✓ Cleaner applications and fewer downstream corrections

✓ A complete, auditable record of every conversation
