

1,000

Mortgages facilitated nationwide — program target

10–13k

Qualified, high-intent users required to hit that target

100%

Of closings worked and closed by the lender's own team

50/50

Cap table, net margin, and all add-on revenue

TWO WAYS TO PARTNER

OPTION A — RECOMMENDED

Joint venture · NewCo, minimum 50/50

- **Ownership:** NewCo formed between our company and the lender, minimum 50/50 on the cap table.
- **Exit protection:** mutual right of first refusal — either partner may buy the other out at fair market value before any outside sale.
- **Lead flow:** leads are routed only where the lender has licensed availability and closer capacity.
- **Execution:** the lender's team works and closes 100% of every deal.
- **Add-on revenue split 50/50** on all leads we send: insurance, real estate, title, and hard money.
- Replaces the monthly sponsorship fee entirely.

PER-FUNDED-LOAN ECONOMICS

LINE ITEM	PER LOAN
Gross revenue to NewCo (illustrative)	\$7,000
Lender's closing team	(\$1,000)
Marketing reinvestment	(\$1,000)
Our team	(\$500)
Total cost of goods sold	(\$2,500)
Net margin to NewCo	\$4,500
Lender's 50% share	\$2,250
Our 50% share	\$2,250

IF GROSS REVENUE PER FUNDED LOAN IS...	\$5,000	\$7,000	\$9,000
Net margin after \$2,500 COGS	\$2,500	\$4,500	\$6,500
Each partner, per loan	\$1,250	\$2,250	\$3,250
Each partner, at 1,000 loans	\$1.25M	\$2.25M	\$3.25M

The \$2,500 COGS is fixed by structure; every dollar of revenue above it splits evenly. The model works at \$5,000 per loan and compounds from there. Add-on categories are incremental to the table above.

OPTION B — ALTERNATIVE

Exclusive platform sponsorship · \$32,500 / month

Sole mortgage lender on the platform. No equity, no revenue share, no closing-cost participation — a flat \$390,000 per year for category exclusivity. At the \$7,000 mid-case, the joint venture matches that figure at roughly **174 funded loans** and every loan after that is upside.

HOW THE VOLUME IS PRODUCED

Traffic is not bought on the open market. It is generated and qualified by three proprietary systems we own and operate.

R0cketShip

r0cketship.com

The distribution engine. Builds and operates a nationwide network of white-label, search-optimized properties across forty-plus niches, then delivers ZIP-exclusive leads straight into the partner's CRM. Owns the top-of-funnel inventory so acquisition cost is controlled rather than bid on.

Predictive Data

predictivedata.org

The demand engine. Scores and targets audiences on intent signals before a form is ever filled, so spend concentrates on the households statistically closest to a mortgage decision. This is what compresses 10,000–13,000 users into 1,000 funded loans instead of a far larger, far colder pool.

KeywordCalls

keywordcalls.com

The conversion layer. High-intent prospects are delivered as live inbound phone calls, in real time, keyword by keyword, routed to the closer's line. A ringing phone from a self-selected searcher converts at a different rate than a submitted form.

OTHER EXCLUSIVES AVAILABLE

Category exclusivity is sold one partner deep. Mortgage is the anchor; these remain open:

Insurance

Title insurance

Home services

Real estate

Hard money

To finalize — three inputs from you

- **Average gross revenue per funded loan** in your channel. The model assumes it clears \$5,000 comfortably; confirm your real number and we size the deal against it.
- **Monthly closing capacity and licensed states**, so lead routing is matched to where you can actually take volume.
- **Which structure** — joint venture or flat sponsorship.

Timing. Terms can be papered and the program stood up this month. Lead delivery begins as soon as routing rules and closer capacity are confirmed.
